

BKR and KNG 5000 Channel Portable and Mobile Radio Firmware Installation Instructions

Purpose

This document describes the procedure for proper installation of factory released firmware for BK Radio 5000 channel, BKR portable, KNG portable, and KNG mobile radios.

Radio Models

Mobile Radio Models:

KNG-M150, KNG-M400, KNG-M500, and KNG-M800

Mobile Radio Control Heads: KAA0660 and KAA0670

Portable Radio Models:

BKR5000, KNG-P150, KNG-P400, KNG-P500, and KNG-P800

In addition to model types, the KNG Portable is available in two versions. 5000 channel, P25 Trunking Capable/Upgradable or 512 channel, P25 Conventional only (KNG-S models).

These instructions are for 5000 channel versions only.

Portable Radio Identification

Your radio version can be determined by observing the LCD display during power up or from the radio serial number.

Trunking Capable/Upradable KNG-S Conventional Only

5000 Channel, P25 Trunking Capable/Upgradable version will display the BK Technologies logo at power-up and have a "9" as the fifth digit in the serial number.

KNG-S version will briefly display the radio model number at power up and have a "0" as the fifth digit in the serial number.

These instructions do not apply to KNG-S model portables.

Important

KNG2 radios with firmware version <5.5.0f will not be properly detected in Lightning Light.

Please read and follow the directions at the end of this document to update correctly.

Portable Radio Installation

- 1. Open the zipped file containing firmware update files.
- 2. Run the executable file to install Lightning Light.
- 3. Open the program from the Windows start menu.
- 4. Connect the radio to the PC via program cable.
- 5. While holding the radios push-to-talk, turn on radio power. (Note: The radio must be connected to the computer before power-up.)
- 6. When the top LED flashes blue, release the push-to-talk button.
- 7. Lightning Light will automatically detect the correct device to updated. Click "Start" to begin the update.

- 8. A status bar will indicate the progress of the firmware update.
- 9. Wait for the radio to reboot then disconnect the radio from the PC.
- 10. Exit the program by clicking the "X" at the top right or start at step 4 to update another radio.

Mobile Radio Installation

- 1. Open the zipped file containing firmware update files.
- 2. Run the executable file to install Lightning Light.
- 3. Open the program from the Windows start menu.
- 4. Connect the radio to the PC via USB cable.
- 5. While holding the microphones push-to-talk, turn on radio power. (Note: The radio must be connected to the computer before power-up.)
- 6. When the front LED flashes blue, release the push-to-talk button.
- 7. Lightning Light will automatically detect the correct device to updated. Click "Start" to begin the update.

Important for Radios with older Firmware

All-in-One Lightning Light includes the firmware for HCH, Mobile, Portable, Portable-G2 and RCH. It will automatically detect the correct device once the device is put into the flashing mode.

KNG2 radios with firmware version <5.5.0f will not be properly detected, follow the instructions below.

- 1. Open the Lightning Light executable.
- 2. Navigate to the "Options" menu at the top.
- 3. Select "Flash <5.5.0c KNG2s"
- 4. Choose "Portable-G2" from the "Builds" section.
- 5. Click "Start" to begin update.
